## EDUCATION

---

**Bachelor of Computer Science, Major in Computer Science**  
Dalhousie University

*Sept. 2018 - May 2022*

## SKILLS & INFO

---

<b>Languages and Tools</b>	Node.js, Java, SQL, PL/SQL, HTML, JavaScript, PHP, Python
<b>Technical Skills</b>	Algorithm & Data Structure Design, Back-end Development
<b>Other Skills</b>	Agile (Scrum), Git, Bash, Linux environments

## PROFESSIONAL EXPERIENCE

---

<b>Software Developer I</b> <i>Innovation, Science and Economic Development Canada</i>	Feb. 2021 - Present
---	---------------------

- Developed and maintained web apps using HTML5, JavaScript, CSS in order to visualize open data
- Integrated Spin.js & Google Maps, Cloud Platform with applications to streamline development and improve UX
- Modernized web app architecture through the implementation of micro-services design pattern, reducing data load times by 65%
- Gathered requirements from clients in order to determine project scope and requested feature feasibility
- Analyzed software performance and usability through unit and integration testing before deployment
- Researched and advised management on product issues, technical design and preparing documentation

<b>Software Developer Intern</b> <i>National Research Council of Canada</i>	Sept. 2020 - Dec. 2020
--	------------------------

- Developed and maintained Oracle Platform apps using HTML5, JavaScript, and CSS in order to optimize business operations
- Maintained and tested an Oracle SQL database and wrote PL/SQL scripts to perform CRUD operations
- Deployed and integrated web applications with content management systems in order to streamline information accessibility
- Practiced the Agile (Scrum) project management methodology and participated in code reviews

## PROJECTS

---

<b>Dalhousie Community Outreach Project I</b>	May 2019 - August 2019
---	------------------------

- Developed middleware using Express and Node.js to connect between a MongoDB database and an AngularJS front-end allowing for file uploads and future development of reports, achieving faster clerical processing
- Extended design of project to allow for greater file types and secure file storage, providing greater interoperability with existing systems
- Practiced the Agile (Scrum) project management method and participated in team meetings
